

CALENDARING SYSTEMS AND METHODS

ABSTRACT OF THE DISCLOSURE

A calendaring system communicatively coupled to a network comprises: a

- 5 calendar engine capable to store and display event data from a calendar database; a
portrait database capable to store portraits of users; the portraits including relationship
settings for users; and an event engine, communicatively coupled to the calendar engine
and portrait database, capable of scheduling events (including implicit events), sending
events invitations and responding to an event invitation received, and offering appropriate
10 services related to those events, via the network, as a function of time availability as
indicated in the calendar database, relationship settings, and lifestyle wishes, monitors
and gauges of the participants in the event as indicated in the portrait database.
